

CUMULATIVE INDEX 1998

Volume 25

January	SKIN RESURFACING, pages 1-133
April	BREAST RECONSTRUCTION WITH AUTOLOGOUS TISSUE, pages 135-319
July	WOUND HEALING: STATE OF THE ART, pages 321-483
October	COMMON PEDIATRIC PLASTIC AND RECONSTRUCTIVE DIAGNOSES, pages 485-661

Note: Page numbers of article titles are in **boldface** type

- Abdominal wall, anterolateral, anatomic features of, 237-240
 complications of, and problems associated with
 TRAM flap donor site closure, 235
 in breast reconstruction, 235-249
 terminology associated with, 236-237
 for TRAM flap for breast reconstruction, 161-162
 muscles and aponeuroses of, 238-239
 blood supply of, 239-240
- Absorbents, 434
- Accutane, in dermabrasion, 68, 82
- Acne, active, dermabrasion in, 65-66
 following CO₂ resurfacing, 129
 in children 10 to 15 years, aesthetic considerations and, 633
 scarring due to, CO₂ laser resurfacing in, 119, 124-125
 dermabrasion in, 63-65, 85
- Acne scars, new, following dermabrasion, 76
- Acquired deformities, management of, team approach to, 485-491
- Actinic cheilitis, CO₂ laser resurfacing in, 120
- Actinic damage, dermabrasion in, 66
- Actinic keratoses, phenol peel in, 5, 6
- Acylovir, dermabrasion and, 69, 70-71, 82
- Adhesion molecules, wound healing and, 361
- Aesthetics, and pediatric population, 580, **631-649**
- Airway, injuries to, in neonatal intensive care unit, 609-612
- Alginates, 435-436
- AlloDerm, 417-418
- Alpha hydroxy acid peels, activity of, factors determining, 45-46
 bioavailability of, 46
 considerations in, 45-52
 contraindications to, 48
 depth of peel and, 45
 hill-valley technique of, 50
 patient examination for, 48
 patient interview for, 47-48
 pH of, 46
 postpeel care in, 50-51
 prepeel program for, 48-49
 properties of, 46
 re-epithelialization following, 51
 techniques for, 50
 uses and benefits of, 46-47
 versus other chemical peels, 50
- Alpha hydroxy acids, 45
- Alveolar bone grafting, 502
- Amblyopia, in child, surgery for, 579-580
- Amniotic fluid, and fetal wound healing, 357
- Analgesia, for pediatric patient in emergency department, 625-626
- Anatomic deformities, correction of, Ilizarov method in, 572-573
- Anesthesia, for CO₂ resurfacing, 122
 for dermabrasion, 72-73
- Anesthetics, for pediatric patient in emergency department, 622-623
- Angiogenesis, in wound healing, 328-329
- Ankyloblepharon, surgery for, 582
- Antibiotics, following CO₂ resurfacing, 126
- Anti-inflammatory drugs, in scar treatment, 461
- Antithrombin III deficiency, ulcers in, 476
- Apert syndrome, 540-541, 548, 549
- Aponeuroses, of abdominal wall, 238-239
 blood supply of, 239-240
- Arterial injuries, acute, in neonatal intensive care unit, 604-609
 diagnosis of, 605-606
 treatment of, 606-607
 results of, 607-609
- Arteriovenous malformations, 518-521
- Arthritis, rheumatoid, ulcers in, 474
- Autologous tissue, **135-143**
 breast reconstruction with, **135-316**
 for delayed breast reconstruction, 157-161
 for immediate breast reconstruction, 152
- Baker-Gordon formula, for phenol peel, 21, 22, 23, 24, 29, 30
- Behavior problems, in children with clefts, 593-594
- Bender's syndrome, cartilage grafting in, 638
- Biobrane, for human skin replacement, 408

- Birthmarks, common, diagnosis and treatment of, 509-525
- Bite wounds, management of, in pediatric patient in emergency department, 627
- Blepharophimosis syndrome, surgery for, 583
- Blepharoplasty, laser. See *Laser(s)*, *blepharoplasty*.
skin-muscle flap, disenchantment with, 95
- Blepharoptosis, congenital, surgery in, 580-581
- Blood vessels, auxillary recipient, dissection of, for breast reconstruction, 209-210
- internal mammary, as recipient site, 213-221
anatomic study for, 213-214
results of, 214, 215, 216
cases illustrating, 217-218
diameter and site of, 219-220
preoperative examination of, 214, 215
surgical approach for, 214-217
time of breast reconstruction and, 219
dissection of, 216-217
- of subscapular system, 208-209
- recipient, for delayed breast reconstruction, 208
for immediate breast reconstruction, 207-208
for superior gluteal free flap breast reconstruction, 269-270
selection of, for breast reconstruction, 207
various, for breast reconstruction, 210-211
- Blount disease, correction of, Ilizarov method for, 573, 574
- Bone(s), angular deformity of, Ilizarov method in, 573, 575
generation of, Ilizarov method for, 567
transport of, examples of, 570, 571
- Brachial plexus, anatomical distribution of, 527
- birth injuries of, and current management of, 527-536
cause of, 527, 528
historical perspective on, 528
initial exploration of, in obstetric brachial plexus palsy, 531-533
- Brachial plexus palsy, obstetric, clinical presentation and classification of, 531
conservative management of, 531
incidence of, 528-529
initial surgical approach in, 533
origin and predisposing factors in, 529
pathophysiology of, 529
physical examination in, 529-530
postoperative course in, 533
primary reconstruction in, results of, 533
secondary reconstruction in, 533-535
assessment of, 535
assessment prior to, 533
postoperative course of, 535
surgical management of, 531-535
treatment of, 527-528
types of nerve damage seen in, 529
- Breast development, in children 10 to 15 years, aesthetic considerations and, 633, 641-645
- Breast reconstruction, abdominal wall complications in, 235-249
autogenous, contralateral procedures for symmetry in, 231-232
secondary shaping in, of skin envelope, 230, 231
timing of, 230
volume adjustments for, 230-231
autogenous tissue versus implant reconstruction for, 312
autologous, delayed, operative considerations for, 226
preoperative markings for, 225
shaping of donor flap for, 226-230
immediate, operative considerations for, 225-226
preoperative markings for, 224, 225
preoperative considerations for, 223-224
shaping of, 223-234
results of, 232-234
autologous tissue alternatives for, 312-314
bilateral, 251-259
free TRAM flap for, 253-255
perforator flap for, 253
unique features of, 251, 252
choice of technique for, 311-316
oncologic considerations for, 311-312
patient considerations for, 311
delayed, 157-166
autologous tissue for, 157
results of, 159-161
surgical techniques for, 158-159
total autogenous latissimus flap in, 261-266
immediate, 145-156
advantages of, 146-149
and adjuvant therapies, effect on reconstructive outcome, 153-154
approach to patient for, 149
autologous tissue for, 152
background of, 145-146
controversies in, 152-154
cosmetic benefits of, 146-148
in patients with advanced disease, 153
oncological safety and, 152
psychosocial benefits of, 146
recipient vessels for, 207-208
reduced cost of, 149
reduced morbidity associated with, 148
skin-sparing mastectomy technique for, local recurrence and, 152-153
technical options for, 149-152
tissue expansion and breast implants for, 149, 150
tissue flaps and breast implants for, 150, 151
implant-based, advantages of, 135
costs of, 135-136
disadvantages of, 135-136
in high-risk patients, avoiding of, 240-241
recipient blood vessels for, 207-208, 210-211
restoration of symmetry in, 314
selection of flap for, 207
selection of recipient vessels for, 207
superior gluteal free flap for, 267-274
using pedicled TRAM flap, 167-182
with autologous tissue, 135-316
advantages of, 136-137, 138
alternatives to, 139
costs of, 139, 140
disadvantages of, 137-139
- Burns, treatment of, advances in, 407
- Cadaver allograft skin, 407-408
- Café-au-lait macules, 521
- Cancer, and wound healing, 371-372
- Cannulas, continuous evaluation of, in regard to position, guidelines for, 610-612
- Capillary hemangioma, surgery for, 584
- Capillary malformations, 515-517
- Cartilage grafts, in pediatric patient, 636-638
- Catheters, umbilical artery, injuries associated with, 603-604
- Chalazion, surgery for, 584
- Cheilitis, actinic, CO₂ laser resurfacing in, 120
- Chemosurgery, dermabrasion and, 69
or laserabrasion, versus dermabrasion, 78-79

- Chemotherapy agents, inhibiting wound healing, 371
- Chickenpox scarring, dermabrasion in, 67
- Child(ren), aesthetic considerations in, 580, 631-649
- age 1 to 15 years, aesthetic considerations in, 631
 - age 5 to 10 years, aesthetic considerations in, 631-632
 - age 10 to 15 years, aesthetic considerations in, 632-633
- common plastic and reconstructive diagnoses in, 485-649
- eyelid surgery in, special considerations for, 579-580, 639, 640
- facial deformities in, neuropsychologic impact of, 587-597
- older, with craniofacial abnormalities, attachment problems of, 592-594
 - with clefts, behavior problems in, 593-594
- Chin, augmentation of, cartilage grafting for, 636, 637
- Silastic implants for, 645-646
- Cholesterol plaques, embolization of, 477
- Cleansers, following CO₂ resurfacing, 127
- Cleft hand, 547, 548, 562, 565
- Cleft lip, and cleft palate, primary treatment of, timing and technique of, 495
- treatment of, ancillary care in, 495-496
 - research on mother-infant relationships in, 591
 - secondary deformities in, 502-506
 - treatment of, 496-500
 - algorithms for, 493-507
- Cleft nose deformity, approach to, 495
- secondary to cleft lip and cleft palate, 503-505
- Cleft palate, and cleft lip, primary treatment of, timing and technique of, 495
- treatment of, ancillary care in, 495-496
- bilateral, treatment of, 501
- hospitalization to correct, attachment behavior and, 592
- research on mother-infant relationships in, 591
 - secondary deformities in, 502-506
 - treatment of, 500
 - algorithms for, 493-507
 - international centers for, survey status of, 493-495
- Clefts, children with, behavior problems in, 593-594
- Clinodactyly, of thumb, 546-547
- Clubfoot, Ilizarov method in, 573-575
- CO₂ laser(s), 2, 92-93
- and dermabrasion, efficacy of, compared, 81
 - background and evolution of, 109
- Coherent 5000, 117
- Luxor, 118
- Paragon, 118
- physics of, 109-113
- resurfacing with, 109-130
- as long lasting, 109, 110-113, 114
 - comparison of different lasers for, 116-118
 - complications of, 127-129
 - contraindications to, 120
 - indications for, 119-120
 - laser-tissue interaction in, 113-116
 - limitations of, 119-120
 - long-term histology of, 118-119
 - postoperative care following, 125-127
 - preoperative assessment for, 121
 - preoperative medications for, 121
 - pretreatment skin regime for, 121-127
 - procedures on day of, 122-123
 - results of, 129
 - special precautions for, 120-122
 - technique of, 122-127
- Sharplan Feathertouch-Silktouch, 117-118
- true pulse, 118
- Ultrapulse, 3
- Collagen, scar formation and, 360-361
- synthesis of, in wound healing, 330-332, 333
- Collagenase activity, in acute versus chronic wounds, 350, 351
- Coloboma, surgery for, 583-584
- Communication, human, human face in, 588-589
- in human living groups, 587
 - nonverbal, 587-588
- Compression pressure, to prevent burn scar hypertrophy, 457-458
- Congenital deformities, management of, team approach to, 485-491
- Connective tissue disease, ulcer formation in, 474-475
- Consolidated Omnibus Budget Reconciliation Act (COBRA), emergency department and, 620-621
- Continuous positive airway pressure (CPAP) devices, airway injuries due to, 609-612
- treatment of, 612-613
- Craniofacial abnormalities, clinical implications of, case study of, 594-596
- impact of, on mother-infant relationship, 590-592
 - importance of, to other children with clefts, 593-594
 - psychopathology in children with, 593
- Croton oil data, on phenol peels, 24-25
- Cryofibrinogenemia, ulcers in, 476
- Cryoglobulinemia, ulcers in, 476
- Cultured cells, genetic modification of, to promote wound healing, 416
- Cultured grafts, infection of, 415-416
- Curettage, in congenital melanocytic nevi, 522
- Cysts, dermoid, surgery for, 584-585
- Cytokine(s), 321-323
- chronic wounds and, 347-348
 - in wound healing, 321, 322, 362
 - release of, in healing, 322
- Cytotoxic membrane attack complex, 327
- DCIA flap. See *Rubens flap*.
- Debridement, in chronic problem wounds, 376
- Decubitus ulcers. See *Pressure ulcer(s)*.
- in neonatal intensive care unit, 614
- Deep inferior epigastric artery perforator flap. See *DIEA flap*.
- Deep inferior epigastric perforator flap, 162, 165
- Deformities, congenital and acquired, management of, team approach to, 485-491
- Depigmentation, postpeel, 13, 17
- Dermabrasion, 63-80, 81-88
- Accutane and, 82
 - adjunctive procedures following, 76-78
 - and Co₂ laser, efficacy of, compared, 81
 - anesthesia for, 72-73
 - autoaugmentation therapy with, 65, 66
 - chemosurgery or laserabrasion versus, 78-79
 - complications of, 75-76, 87
 - contraindications to, 67-70
 - cosmetic and therapeutic benefits of, 63, 64, 65, 81-85
 - depth of wound in, control of, 86
 - dermatologic disorders treated by, 63
 - hemangiomas and, 66-67
 - history of, 1
 - in congenital melanocytic nevi, 522
 - indications for, 63, 64, 65, 81-85
 - informed consent for, 70
 - instrumentation for, 71, 85, 86
 - mechanism of action of, 71, 85, 86
 - medications and pill schedule following, 68

- Dermabrasion (*Continued*)
 modern technique of, development of, 1-2
 office and staffing considerations for, 71-72
 patient education for, 70
 patient selection for, 63, 64, 65, 81-85
 physician qualifications and technical skills for, 70
 postoperative care in, 73-75, 86-87
 postoperative considerations for, 70-71
 postoperative sequelae of, 75-76
 psychiatric evaluation for, 70
 re-epithelialization following, 67, 74
 repeating of, 79
 rhytidectomy and, 66
 special considerations in, 67-70
 surgical methods for, 73
 technique of, 85-86
 unfavorable results of, 76
- Dermagraft, for skin replacement, 411-413, 414-415
- Dermatologists, trichloroacetic acid peels and, 2
- Dermoid cysts, surgery for, 584-585
- des Marres retractor, for laser blepharoplasty, 97, 99, 100, 101
- Dextranomers, 436
- DG-TC, for temporary skin closure, 409
- Diabetes mellitus, wound healing in, 371
- Diabetic ulcers, 345-346, 381, 388-389, 391
- DIEA flap, 197-206, 253
 clinical cases illustrating, 203, 204, 205
 donor site closure in, 199-201, 202
 flap harvesting for, 198-199, 200, 201
 flap shaping in, 202
 nipple-areola complex reconstruction, opposite breast and, 203
 patient selection for, 197
 postoperative management in, 202-203
 preoperative management in, 197-198
 recipient vessel dissection for, 201-202
 surgical technique for, 197-202
- DIEP flap, 162, 165
- Digits, distraction osteogenesis of, 561-566
- Distichiasis, surgery for, 584
- Distraction osteogenesis, applications of, 553-566
 case reports of, 557-559
 distraction devices for, 556, 557
 evaluation of patient for, 555-556
 imaging for, 556
 in bilateral mandibular hypoplasia, 554-555
 in hemifacial microsomia, 553-554
 in micrognathia, 554-555
 in pediatric upper extremity, 561
 in unilateral mandibular hypoplasia, 553-554
 of hand and digits, 561-566
 radiographic studies for, 555-556
 surgical procedures for, 556-557
- Drapes, for laser blepharoplasty, 97
- Dressing techniques, for phenol peels, 43
- Dressings, 433-441
 alternative, 439
 correct, selection of, 437, 438
 current categories of, 434-440
 emerging technology in, 439-440
 for palliative, 439
 ideal, characteristics of, 433
 impregnated, 434
 in chronic problem wounds, 377
 occlusive, following phenol peeling, 8, 9-11, 12
 reimbursement and medicolegal issues related to, 437-439
- Drug therapy, in chronic problem wounds, 377-378
 to prevent excessive scar formation, 460-462
- Drug toxicity, ulcers due to, 387-388, 389, 390
- Dysproteinemias, ulcer formation in, 476
- Ears, aesthetic surgery of, in pediatric patient, 639-641
- Ectodermal dysplasia, congenital, dermabrasion and, 68
- Ectropion, of lower eyelid, postpeel, 18
- Eczematization, following dermabrasion, 75
- Edema, control of, in chronic problem wounds, 377
- Elastase activity, in chronic wound fluid, 350
- Elastin, in wound healing, 332
- Electrodesiccation, following dermabrasion, 78
- Emergency department, pediatric patient in, analgesia for, 625-626
 anesthetics and sedation for, 622-623
 forms of injury of, 619
 infectious diseases and, 626-627
 interaction with parent in, 621
 postexposure rabies prophylaxis for, 627-628
 sedatives for, 623-625
 special considerations for care of, 621-622
 tetanus immunization for, 626-627
 staff of, 619-620
- Emergency Medicine, physicians boarded in, 620
- Emergency room service, plastic surgery, common problems seen by, 619-629
- Entropion, congenital, surgery for, 581-582
- Eosinophils, in wound healing, 326
- Epiblepharon, surgery for, 582
- Epicanthal folds, surgery for, 582-583
- Epidermal-dermal(composite) cultured grafts, development of, 413-415
- Epidermal growth factor, wound healing and, 362-363
- Epidermal nevus syndromes, 523
- Epithelial growth factor, wound healing and, 362-363
- Epithelialization, in wound healing, 329-330, 454
- Epithelium, cultured, development of, for skin replacement, 410-411
 dysplastic, regeneration of, following chemical peel, 5, 6
- Erythema, following CO₂ resurfacing, 127-128
 following dermabrasion, 75
 postpeel, 13
- Euryblepharon, surgery for, 582
- Extensor tendon deficiencies, 548-551
- Extracellular matrix, wound healing and, 360-362
- Extravasation injuries, intravenous, full-thickness, 601, 602
 in neonatal intensive care unit, 599-602
- Extravasation protocol, hyperosmotic, 601
- Eye shields, stainless steel, for laser blepharoplasty, 97
- Eyelid(s), lesions of, surgery for, 584-585
 lower, laxity of, CO₂ resurfacing in, 120-121
 postpeel ectropion of, 18
 malformations of, surgery for, 583-584
 malposition of, surgery for, 580-583
 surgery of, 579-586
 general considerations for, 579
 in pediatric population, special considerations for, 579-580, 639, 640
- Eyes, protection of, for laser blepharoplasty, 97-98
- Face, chemical peeling of, modified phenol for, 21-44
 deformities of, in children, neuropsychologic impact of, 587-597
 four zones of, 26
 human, in attachment and bonding, 589-590

- in human communication, 588-589
- Fanconi anemia syndrome, 541
- Fat pads, infraorbital, resection of, for laser blepharoplasty, 102
 - lower lid, dissection of, for laser blepharoplasty, 99-101
 - upper lid, resection of, for laser blepharoplasty, 103
- Fentanyl (Sublimaze), for pediatric patient in emergency department, 625
- Fetal environment, and wound healing, evaluation of, 358
- Fetal wound, 357-365
 - repair of, gestational age and epithelial-mesenchymal interactions in, 358-359
 - intrinsic factors influencing, 358-360
 - organ specificity and, 359
 - species differences and, 359
- Fetus, fibroblast of, wound healing and, 359-360
- Fibrin, in wound healing, 323
- Fibrin cuff hypothesis, of wound healing, 344
- Fibroblast, fetal, wound healing and, 359-360
- Fibronectin(s), 323
 - in wound healing, 332, 361
- Fibroplasia, as phase of wound healing, 398-399
- Finger, ring, ray absence, 562, 565
- Fitzpatrick type I skin, phenol peel in, 4
- Fitzpatrick type II skin, phenol peel in, 4, 5
- Flexion contractures, 544-546
- Foams, 434-435
- Foot(Feet), free-tissue transfer to, in chronic problem wounds, 379
 - revascularization of, 379
 - vascular supply to, and wound healing, 379
- Foreign bodies, impairing wound healing, 369, 370-371
- Fractures, treatment of, Ilizarov method in, 569-570
- Frontalis suspension, in blepharoptosis, 581

- Gallo, Arthur, 29
- Gel sheeting, in treatment of hypertrophic scars, 458, 460
- Gluteal artery perforator flap, inferior, 302
 - superior, 267, 293-302
 - breast mound creation for, 299
 - donor site closure in, 294-299
 - flap dissection for, 294, 295, 296
 - preparation and marking for, 294, 295
 - recipient vessel dissection for, 294
 - surgical techniques for, 294-299
 - vessel anastomosis for, 299
- Gluteal free flap, inferior, 140, 142, 267-268, 314
 - anatomic relations of, 276
 - for breast reconstruction, 275-282
 - donor site closure in, 279-280
 - flap elevation for, 277-279
 - flap transfer and inset in, 280, 281
 - operative technique for, 277-281
 - positioning and markings for, 277
 - postoperative care in, 280-281
 - preparation of recipient site for, 279
 - superior, 314
 - for breast reconstruction, 267-274
 - experience with, 268
 - flap design for, 269
 - flap dissection and closure for, 270-272
 - flap insertion for, 273-274
 - indications for, 268-269
 - microvascular anastomosis in, 272
 - operating room position for, 270
 - recipient vessels for, 269-270
 - Gluteal region, anatomy of, 293-294
 - Glycosaminoglycans, wound repair and, 361-362
 - Grade, Arthur, 29
 - Grade peels, formula for, 29
 - Graftskin, for skin replacement, 415
 - Growth factor(s). See also *Cytokine(s)*.
 - chronic wounds and, 347-348
 - epidermal, 401
 - exogenous, modification of wound healing with, 397-405
 - fibroblast, 402
 - insulin-like, 402-403
 - keratinocyte, 402
 - platelet-derived, 399-401
 - transforming, 401
 - vascular endothelial, 401
 - wound healing and, 362-363
 - Gynecomastia, aesthetic considerations in, 633, 643-645

 - Hand, and digits, distraction osteogenesis of, 561-566
 - cleft, 547, 548, 562, 565
 - problems of, congenital, 537-552
 - causes of, 538-539
 - complex multistaged procedures in, 547-551
 - operative intervention in, contradicted, 547
 - surgical treatment of, after first year/before three years, 542-547
 - terminology associated with, 537-541
 - treated by splinting, stretching, and nonoperative measures, 541
 - treated operatively before six months, 541
 - treated operatively between six months and one year, 541-542, 543, 544
 - Hemangioma(s), and abnormalities of other organs, 513
 - capillary, surgery for, 584
 - complications of, 509-515
 - compromise of function due to, 511
 - dermabrasion and, 66-67
 - diagnosis and treatment of, 509-515
 - multiple cutaneous, 511-512
 - treatment of, 513-515
 - indications for, 513-514
 - Hemangiomatosis, benign, neonatal, 511
 - diffuse, neonatal, 511
 - Hemastasis, creation of, 323-325
 - Hematologic conditions, ulcers in, 475-476
 - Hemoglobinopathies, skin ulcers in, 475-476
 - Hernia(s), TRAM flap and, 236-237
 - correction of, 246-247
 - repair of fascia to avoid, 244-245
 - true, TRAM flap and, 236
 - Herpes simplex, dermabrasion and, 69
 - Hetter-Heresy formula, for phenol peel, 24, 25
 - Histamine, 325
 - HIV, as contraindication to dermabrasion, 69
 - Holt-Oram syndrome, 541
 - Hyaluronan, in wound healing, 332
 - Hydrocolloids, 436, 437
 - Hydrogels, 435
 - Hyperalimentation, intravenous infiltrate of, injuries associated with, 602, 603
 - Hyperbaric oxygen therapy, in chronic problem wounds, 378
 - Hyperpigmentation, following CO₂ resurfacing, 128-129
 - following dermabrasion, 75-76, 87
 - postpeel, management of, 13-14
 - Hypersensitivity vasculitis, 470

- Hypertrophic scarring, following dermabrasion, 76, 87
 Hypopigmentation, following dermabrasion, 76, 87
 following phenol peel, 33-35
 Hypoplastic thumb, 544, 546, 548, 550
- I-GAP flap, 302
 Ilizarov method, 567-578
 difference of, from other techniques, 567-568
 external fixator used in, 567, 568
 fracture treatment with, 569-570
 in congenital pseudoarthrosis of tibia, 573
 in nonunions, 570-572
 in osteomyelitis, 572
 limb lengthening in, 568-569
 Immobility, pressure ulcers and, 444
 Immune response, fetal and adult, 362
 Immunizations, status of, of pediatric patient in
 emergency department, 626-627
 Infection, and wound healing, 369
 chronic wounds and, 346
 control of, in chronic problem wounds, 376-377
 of cultured grafts, 415-416
 of soft tissues, in neonatal intensive care unit, 614-616
 postpeel, 14-17
 ulcers in, 476-477
 Infectious diseases, as complication of treatment of
 pediatric patient in emergency department, 626-627
 Inferior epigastric artery perforator flap, deep, 313
 Inflammation, as phase of wound healing, 397-398
 signs of, 325
 Instrumentation, for dermabrasion, 71, 85, 86
 for laser blepharoplasty, 97
 Integra, 416-417
 Intensive care unit, neonatal, plastic surgery problems
 in, 599-617
 Interferon, for treatment of hemangiomas, 514
 Intravenous infiltrate of hyperalimentation, injuries
 associated with, 602, 603
 Ischemia, and wound healing, 368-369
 severe, of upper extremity, following thrombosis
 caused by antibiotic infusions, 607, 608
 Ischemia/hypoxia, chronic wounds and, 346-347
 Isotretinoin, in dermabrasion, 68, 82
- Jaeger lid plate, for laser blepharoplasty, 97, 98, 99
- Kasabach-Merritt syndrome, 512, 515
 Keloid scars, 451, 455
 Keratinocyte migration, chronic wounds and, 348-349
 Ketamine (Ketalar), for sedation of pediatric patient,
 624, 625
 Kinins, 325
 Klippel-Trenaunay syndrome, 516
- Laser(s), basic components of, 89
 blepharoplasty, and resurfacing, of periorbital area,
 95-108
 patient satisfaction with, 108
 postoperative management in, 104
 results of, 104, 105, 106, 107
 safety issues in, 96-97
 complications of, 104-108
 for incisional aspects of blepharoplasty, 96
 instrumentation for, 97
 lower transconjunctival, surgical technique for, 98-
 101
 upper transconjunctival, surgical technique for,
 101-104
 CO₂. See CO₂ laser(s).
 energy, 89
 flashlamp pulsed dye, 515
 for treatment of cafe-au-lait macules, 521
 for treatment of congenital melanocytic nevi, 522
 for treatment of vascular malformations, 517
 in tattoo removal, 92
 light, 89-90
 control and delivery of, 91-92
 physics, and physiology, 89-93
 clinical applications of, 92-93
 resurfacing, and laser blepharoplasty, of periorbital
 area, 95-108
 yttrium aluminum garnet, 515
 Laserabrasion, or chemosurgery, versus dermabrasion,
 78-79
 Lateral transverse thigh flap, 290
 Latissimus dorsi flap, autogenous, breast reconstruction
 using, 230
 extended, 140, 141, 255, 313-314
 for delayed breast reconstruction, 164
 Latissimus flap, total autogenous, for breast
 reconstruction, case studies of, 264-266
 primary, 263
 secondary, 263
 for delayed breast reconstruction, 261-266
 design for, 262, 263
 results of, 263
 shaping of, 262-263
 Letter, pre-authorization, 487-488, 489
 Leukocytoclastic vasculitis, 470
 Levator aponeurosis, advancement of, in blepharoptosis,
 581
 Lid plate, Jaeger, for laser blepharoplasty, 97, 98, 99
 Lidocaine-HCl, for dermabrasion, 72
 Light, amplification of, by stimulated emission of
 radiation, 89-90
 Limbs, lengthening of, Ilizarov method in, 568-569
 Lip(s), cleft. See *Cleft lip*.
 deformities of, secondary to cleft lip and cleft palate,
 502, 504
 LTTF flap, 290
 Lupus erythematosus, systemic, skin ulcers in, 474-475
 Lymphocytes, in wound healing, 326
- Macroglossia, in pediatric patients, 646-647
 Macromastia, aesthetic considerations in, 633, 641-642
 Macrophages, in wound healing, 326
 Mammary blood vessels. See *Blood vessels, internal
 mammary*.
 Mandibular hypoplasia, bilateral, distraction
 osteogenesis in, 554-555
 Mastectomy, elective contralateral, in high-risk patients,
 255, 258
 partial, defects of, breast reshaping in, 307-308
 correction of, contraindications to, 306
 early versus late, 306
 indications for, 303-306
 with distant flaps, 306
 with local tissue, 306-307
 repair of, 303-310
 approaches to, 303

- tissue replacement in, using local flaps, 308-309
 deformities from, 303, 304, 305
 skin-sparing, 261
 for immediate breast reconstruction, local recurrence and, 152-153
- Maturation, as phase of wound healing, 399
- Medications, oral, following CO₂ resurfacing, 126
 topical, following CO₂ resurfacing, 126-127
- Melanocytic nevi, congenital, 521-522
- Meperidine (Demerol), for pediatric patient in emergency department, 625
- Mesenchymal cell migration and proliferation, in wound healing, 327-328
- Mesh, synthetic, for closure of TRAM flap donor site, 245-246
- Microgenia, surgery in, 645-646
- Micrognathia, 559
 distraction osteogenesis in, 554-555
- Micromastia, aesthetic considerations in, 641
- Microskin bits, for wound closure, 418, 419
- Microsomia, hemifacial, 557-558
- Midazolam (Versed), for sedation of pediatric patient, 623-625
- Milia, following CO₂ resurfacing, 129
 following dermabrasion, 75
 postpeel, 17
- Moisturizers, following CO₂ resurfacing, 127
- Mons pubis, as donor site for skin grafting in pediatric patients, 647-648
- Morphine, for pediatric patient in emergency department, 625
- Mother-infant relationship, importance of craniofacial abnormalities on, 590-592
- Muscles, control of nerves by, 530
- Musculoaponeurotic deformity, as high-risk factor for breast reconstruction, 167-168, 240-241
- Musculocutaneous flaps, in chronic problem wounds, 375, 376
- Nager syndrome, 558
- Necrobiosis lipoidica diabetorum, 477
- Neodermis, 416
- Neonatal intensive care unit, plastic surgery problems in, 599-617
- Nerve(s), control of muscles by, 530
- Nerve damage, types of, in obstetric brachial plexus palsy, 529
- Neurofibroma, surgery for, 585
- Neuropsychologic impact, of facial deformities, in children, 587-597
- Neurotic excoriations, dermabrasion in, 67
- Neutrophils, 325-326
- Nevus(i), epidermal, 522-524
 melanocytic, congenital, 521-522
 pigmented, dermabrasion in, 67
- Nevus sebaceous of Jadassohn, 523
- Newborn, aesthetic considerations in, 631
- Nipple-areola complex, reconstruction of, and opposite breast, DIEA flap and, 203
- Nose, cleft deformity of, approach to, 495
 secondary to cleft lip and cleft palate, 503-505
 continuous positive airway pressure (CPAP) devices causing injury to, 609, 610
 deformity of, in pediatric patient, aesthetic considerations and, 633-635
- Nutrition, in chronic problem wounds, 374
 pressure ulcers and, 445-446
- Nutritional screening form, in wound care, 426, 427
- Obesity, as high-risk factor for breast reconstruction, 167-168, 241, 312-313
- Occlusion techniques, following buffered phenol peels, 39
- Occlusive dressings, following phenol peeling, 8, 9-11, 12
- Orthognathic surgery, in cleft lip and cleft palate, 505-506
- Osteogenesis, distraction. *See Distraction osteogenesis.*
- Osteomyelitis, Ilizarov method in, 572
- Otoplasty, followup after, 641
- Oxygen, supplemental, for laser blepharoplasty, 97
- Palate, cleft. *See Cleft palate.*
 deformities of, secondary to cleft lip and cleft palate, 503
- Palsy, brachial plexus. *See Brachial plexus palsy.*
- Patients, transfer of, from emergency department, 620-621
- Pectus excavatum and carinatum, aesthetic considerations in, 642-643, 644
- Peel(s), alpha hydroxy acid. *See Alpha hydroxy acid peels.*
 Grade, formula for, 29
 phenol. *See Phenol peeling; Phenol peel(s).*
 using trichloroacetic acid. *See Trichloroacetic acid, facial peel with.*
- Perforator flap, for bilateral breast reconstruction, 253
- Periorbital area, laser blepharoplasty and resurfacing of, 95-108
- pH data, for buffered phenol peels, 36-39
 on phenol peels, 23-24
- Phenol, 2-3
 as keratocoagulant, 3
 modified, for chemical face peeling, 21-44
 rapid absorption of, 4
 toxicology of, 3-4
- Phenol peeling, and history of phenol peeling, 1-19
 application of chemical mixture for, 6-9
 complications of, 13-18
 formula preparation for, 5-6, 7
 history of, phenol peeling and, 1-19
 hyperpigmentation following, 13-14
 occlusive dressings following, 8, 9-11, 12
 plastic surgeons and, 2
 postpeel care following, 11-13
 re-epithelialization following, 12-13
 results of, 14-16
 skin preparation and degreasing for, 5
 technique of, 5-11
- Phenol peel(s), Baker-Gordon formula for, 21, 22, 23, 24, 29, 30
 buffered, 21
 biopsy data on, 22-23
 complications of, 33-35
 croton oil data on, 24-25
 depth of, factors influencing, 26
 Mascheck-Truppmann formula for, 24, 25, 27-29
 materials for, 21-22
 patient selection for, 25-26
 pH data on, 23-24, 36-39
 postpeel occlusion techniques for, 39
 preoperative consultation for, 26
 procedures for, 26-27
 study of, patients in, 27, 28
 candidates for, 4
 dermal regeneration following, 3
 drawbacks of, 3
 dressings techniques for, 43

Phenol peel(s) (*Continued*)

- Hetter-Heresy formula for, 24, 25
- histologic changes associated with, 3
- indications for, 3, 4
- patient selection for, 4
- Stone II formula for, 33, 34, 35-38, 39-42
- Stone-Maschek-Truppmann formula for, 24
- Stone-Venner-Kellson formula for, 24
- Venner-Kellson formula for, 21, 22, 23, 25, 27, 28, 29
- Photothermolysis, light-tissue interaction in, 90-91
 - selective, 90, 92, 93
- Physical attractiveness, of infant, influence of, on maternal behavior, 590
- Physicians, boarded in Emergency Medicine, 620
 - emergency, consultation with surgeons, 620
- Pigmentation, skin, alteration of, following dermabrasion, 75
 - dark, dermabrasion in, 65, 69
- Pigmented nevi, dermabrasion in, 67
- Plastic and reconstructive diagnoses, pediatric, common, 485-649
- Plastic surgeons, phenol peeling and, 2
- Plastic surgery, problems requiring, in neonatal intensive care unit, 599-617
- Plastic surgery emergency room service, common problems seen by, 619-629
- Platelet-derived growth factor, wound healing and, 363
- Platelet releasates, in wound healing, 403-404
- Platelets, in wound healing, 324
- Poland syndrome, 539, 642, 643
- Polyarteritis nodosa vasculitides, 470-473
- Polydactyly, postaxial, 540-541
 - preaxial, 540-541
- Port-wine stains, 516-517
- Precancerous lesions, sun-induced, phenol peeling in, 5
- Pressure reduction device, development of, chronology of, 446-447
- Pressure relief surfaces, pressure ulcers and, 443-450
- Pressure sores, 382-387
- Pressure ulcer(s), 343, 344, 382-387
 - and pressure relief surfaces, 443-450
 - costs of care associated with, 447-448
 - documentation record of, in wound care, 426, 428-429
 - factors contributing to, 444
 - prevalence of, 430, 431, 443-444
- Prolyl hydroxylase, fetal wound healing and, 360
- Prostaglandins, 325
- Proteases, matrix proteins, chronic wounds and, 349-351
- Protein C deficiency, ulcers in, 476
- Protein S deficiency, ulcers in, 476
- Protein synthesis inhibition, in scar treatment, 461-462
- Proteins, in wound healing, 324
 - matrix, and proteases, chronic wounds and, 349-351
- Proteoglycans, in wound healing, 332
 - wound repair and, 361-362
- Proteolytic enzyme synthesis, stimulation of, in scar management, 462, 463
- Psychologic factors, in chronic problem wounds, management of, 374-375
- Ptosis, unilateral, in pediatric patient, surgery for, 639, 640
- Punch excision, with graft replacement, following dermabrasion, 76-78
- Punch grafts, following dermabrasion, 76
- Pyoderma gangrenosum, ulcers in, 473-474
- Rabies, postexposure prophylaxis, for pediatric patient in emergency department, 627-628
- Radial deficiency, and hypoplastic thumb, bilateral, 548, 550
- Radiation, ionizing, low-dose, to prevent keloid recurrence, 459-460
 - stimulated emission of, amplification of light by, 89-90
- Radiation damage, impairing wound healing, 369
- Radiation ulcers, 387, 388
- Radiodermatitis, dermabrasion and, 68-69
- Re-epithelialization, following alpha hydroxy acid peels, 51
 - following dermabrasion, 67, 74
 - following phenol peels, 12-13
- Resurfacing agents, 2
- Retin-A, in preconditioning for trichloroacetic acid peel, 54-55
- Retractor, des Marres, for laser blepharoplasty, 97, 99, 100, 101
- Rheumatoid arthritis, ulcers in, 474
- Rhinophyma, CO₂ laser resurfacing in, 120, 125
 - dermabrasion in, 67, 84, 85
- Rhinoplasty, in pediatric patient, 633-635
- Rhytidectomy, dermabrasion and, 66
- Rhytides, dermabrasion in, 64, 66, 82-85
- Rubens flap, 140, 142, 255, 283-292, 314
 - anatomy of, 284
 - operative details in, 284-288
 - previous studies of, 283-284
 - results of, 288-290
- S-GAP flap. *See Gluteal artery perforator flap, superior.*
- Scar contractures, 452
- Scarless healing, 357-365
- Scarless surgery, 1
- Scarring, chickenpox, dermabrasion in, 67
 - postpeel, 17-18
 - smallpox, dermabrasion in, 67
 - traumatic, dermabrasion in, 67, 85
- Scars, facial, linear post-traumatic and postoperative, laser resurfacing in, 119-120
 - following dermabrasion, treatment of, 76-78
 - formation of, excessive, 453
 - biophysical therapeutics to limit, 456-460
 - pharmacologic therapy to prevent, 460-462
 - prevention of, 456
 - surgery in, 462-464
 - normal wound healing and, 452-456
 - hypertrophic, 451, 452, 454-455, 458-459
 - problem, 451-465
 - definition of, 451
 - remodeling of, treatment of, 456-464
- Scleroderma, ulcers in, 475
- Sedatives, for pediatric patient in emergency department, 623-625
- Self-induced wounds, 390, 477-478
- Shear, pressure ulcers and, 444-445
- Sickle cell ulcers, 389-390, 392
- Skin, aging, dermabrasion in, 64, 66
 - artificial, for replacement of dermal layer, 416
 - color of, as factor for consideration for trichloroacetic acid peel, 53-54
 - condition of, lifestyle, hormonal conditions, and sun-tan history influencing, 47-48
 - existing conditions of, influence of phenol peel on, 18
 - exophytic lesions of, CO₂ laser resurfacing in, 119
 - Fitzpatrick type I, phenol peel in, 4
 - Fitzpatrick type II, phenol peel in, 4, 5
 - pigmentation of, alteration, following dermabrasion, 75

- dark, CO₂ resurfacing in, 121
 dermabrasion in, 65, 69
 regeneration of, following phenol peel, 3
 thickness of, as factor for consideration for trichloroacetic acid peel, 54
 type of, evaluation of, for trichloroacetic acid peel, 53-54
- Skin equivalents, comparison of, 440
- Skin grafting, aesthetic, in pediatric patients, 647-648
- Skin grafts, meshed, 407, 408
- Skin-muscle flap blepharoplasty, disenchantment with, 95
- Skin refrigerants, for dermabrasion, 72-73
- Skin replacements, 407-423
 development of, 411-413
 temporary, 407-409
- Skin resurfacing, 1-130
- Smallpox scarring, dermabrasion in, 67
- Smoking, and wound healing, 371
 as high-risk factor for breast reconstruction, 167, 240
- Soft tissue(s), generation of, Ilizarov method for, 567
 infections of, in neonatal intensive care unit, 614-616
- Split muscle harvest, for pedicled TRAM flap, 173-176
- Spotabrasion, following dermabrasion, 78
- Steroids, affecting wound healing, 371
 intralesional, for treatment of hemangiomas, 514
 oral, following CO₂ resurfacing, 126
- Stone II formula, for phenol peel, 33, 34, 35-38, 39-42
- Stone-Maschek-Truppmann formula, for phenol peel, 24
- Stone-Venner-Kellson formula, for phenol peel, 24
- Sturge-Weber syndrome, 516
- Subcision surgery, following dermabrasion, 78
- Submucous clefts, treatment of, 500-501
- Subscapular system, vascular anatomy of, 208-209
- Subscapular trunk, vascular options using, 210
- Sunlight, sensitivity to, postpeel, 13
- Sunscreens, following CO₂ resurfacing, 127
- Supra-Whitnall's levator muscle advancement, in blepharoptosis, 581
- Surgery, in chronic problem wounds, 378-379
- Symbrachydactyly, 538
- Syndactyly, 538, 545
- Systemic lupus erythematosus, skin ulcers in, 474-475
- Tattoo, removal of, dermabrasion in, 67
 lasers, 92
- Team approach, to management of congenital and acquired deformities, 485-491
 advantages of, 485
 at Texas Children's Hospital, 485-488
 history of, 485
 interdisciplinary team flow for, 486, 487
 providing resource management and education, 488-490
 team goals in, 490-491
- Tenascin, wound healing and, 361
- Tetanus immunization, for pediatric patient in emergency department, 626-627
- Texas Children's Hospital, team approach to congenital and acquired deformities at, 485-488
- Thigh flap, lateral transverse, 290
- Thoracodorsal vessels, as recipient site, 207-213
- Thrombin, in wound healing, 323-324
- Thrombosis, caused by antibiotic infusions, ischemia of upper extremity following, 607, 608
- Thumb, clinodactyly of, 546-547
 hypoplastic, 544, 546, 548, 550
 trigger, 546
- Wassel type IV duplicated, 544
- Tibia, congenital pseudoarthrosis of, Ilizarov method in, 573
- Tibia vara deformity, correction of, Ilizarov method in, 573, 574
- Tissue, autologous. See *Autologous tissue*.
- Tissue factor, 323
- Tongue, reduction of, in pediatric patients, 646-647
- TRAM flap, 139-141, 207
 abdominal wall complications associated with, 235
 anatomic distribution of blood supply to, 184
 as autologous tissue technique, 139-141
 bilateral free, for autologous breast reconstruction, 228-230
 bilateral pedicled, 251-253
 for autologous breast reconstruction, 226-228
 bipedicled, breast reconstruction with, 170
 bulge(s), 236-237
 correction of, 246-247
 repair of fascia to avoid, 244-245
 closure of, anatomy applied to, 240
 contraindications to, 267, 283, 312-313
 delayed, 183-189
 delay phenomenon and, 183
 evaluation of risk factors for, 183
 in mastectomy deformities, 184, 186
 surgical technique for, 183-184
 vascular delay and, 184, 185, 187, 188
 donor site, closure of, synthetic mesh for, 245-246
 for breast reconstruction, 312-313
 for delayed breast reconstruction, 157-158
 results of, 159-161
 surgical techniques for, 158
 free, 191-195, 207
 complications of, 193-195
 donor site repair in, 242, 243
 extended, for thin patients, 255, 256-257
 flap elevation for, 192-193, 194
 for bilateral breast reconstruction, 253-255
 for delayed breast reconstruction, contraindications to, 162-164
 indications for, 192
 rationale for, 191-192
 technique of, 158, 165
 versus pedicled, for delayed breast reconstruction, 161-162
 harvesting of, and donor site closure, outcomes after, 241-244
- hernias and, 236-237
 correction of, 246-247
 repair of fascia to avoid, 244-247
- pedicled, and creation of mound, 169-172
 breast aesthetics and, 169-172
 breast reconstruction with, 167-182
 anatomy and circulatory dynamics in, 168
 complications of, 179-181
 flap inset and breast mound creation with, 177-179, 180-181
 patient selection for, 167-168
 planning and marking for, 172
 postoperative care following use of, 179
 procedure selection for, 168-169
 secondary procedures in, 181-182
 split muscle flap elevation for, 176-177
 split muscle harvest for, 173-176
 donor site repair in, 242, 243
 for delayed breast reconstruction, 170
 for immediate breast reconstruction, 170
 unilateral free, for autologous breast reconstruction, 228, 229

- TRAM flap (*Continued*)
 unilateral pedicle, for autologous breast reconstruction, 226, 227
 unpedicled, breast reconstruction with, 172-173
 zones for, 168-169
 Transforming growth factor beta, wound healing and, 362
 Transparent synthetic adhesive films, 434
 Transverse rectus abdominis musculocutaneous flap.
 See *TRAM flap*.
 Traumatic scarring, dermabrasion in, 67, 85
 Treacher-Collins syndrome, case study of clinical implications of, 594-596
 Tretinoin, topical, treatment with, for dermabrasion, 70
 Trichloroacetic acid, facial peel with, 3
 art of, 53-62
 candidates for, 4-5
 chemical procedure for, 55-57
 complications of, 58-60
 depth of, evaluation of, 57
 factors influencing, 27
 dermatologists and, 2
 designing peel depth for, 55
 evaluation of skin problems prior to, 55
 evaluation of skin type for, 53-54
 history of, 53
 in post phenol peel hyperpigmentation, 13
 postpeel management in, 57-58
 preconditioning skin program for, 54-55
 results of, satisfaction with, 58-62
 Trigger thumb, 546
 Tumors, Ilizarov method in, 575, 576
 Turner's syndrome, aesthetic considerations in, 632
- Ulcer(s), arterial, management of, 379-380, 381
 chronic, uncommon, 390-391
 clinical assessment of, 467-468
 diabetic, 345-346, 381, 388-389, 391
 diagnosis and treatment of, 469
 differential diagnosis of, 468
 due to drug toxicity, 387-388, 389, 390
 etiology of, 467
 factitious, 390, 477-478
 in rheumatoid arthritis, 474
 pressure. See *Pressure ulcer(s)*.
 radiation, 387, 388
 sickle cell, 389-390, 392
 uncommon causes of, 467-479
 vasculitis, management of, 380-382, 384-385
 venous, 344-345
 management of, 380, 382, 383
 Ultrapulse CO₂ laser, 3
 Ultrasonic tissue heating, in problem scars, 459
 Umbilical artery catheters, injuries associated with, 603-604
 Upper extremity(ies), application of Ilizarov method in, 577
 pediatric, distraction osteogenesis in, 561
 severe ischemia of, following thrombosis caused by antibiotic infusions, 607, 608
- Varicella scarring, dermabrasion in, 67
 Variola scarring, dermabrasion in, 67
 Vascular injuries, in neonatal intensive care unit, 602-613
 Vascular malformations, 515-521
- Vasculitis, 469-473
 hypersensitivity, 470
 leukocytoclastic, 470
 polyarteritis nodosa, 470-473
 Vasculitis ulcers, management of, 380-382, 384-385
 Velopharyngeal incompetence, 501-502
 Venner-Kellson formula, for phenol peel, 21, 22, 23, 25, 27, 28, 29
 Venous insufficiency, chronic, and wound healing, 369-370
 Venous malformations, 517-518
 Venous ulcer, 344-345
 Video imaging system, portable, 486, 488
 Virginal hypertrophy, aesthetic considerations in, 641-642
 Vitiligo, dermabrasion and, 66
- Wassel type IV duplicated thumb, 544
 White cell hypothesis, of wound healing, 344
 Whitnall's sling, in blepharoptosis, 581
 Windblown hand, 546
 Wound care, annual prevalence data summary of, 426-431
 following CO₂ resurfacing, 125-126
 nutritional screening form in, 426, 427
 pressure ulcer documentation record in, 426, 428-429
 Wound care team, 425-426
 Wound contraction, 332-333
 Wound healing, 321-479
 cancer and, 371-372
 cellular makeup of, 327
 chemotherapy agents inhibiting, 371
 chronic venous insufficiency and, 369-370
 dynamics of, 367-368
 early events in, 323-327
 final event in, 333-334
 foreign bodies impairing, 369, 370-371
 genetic modification of cultured cells to promote, 416
 iatrogenic agents affecting, 372
 impairment of, 368-372
 in diabetes mellitus, 371
 infection and, 369
 inflammatory phase of, 342
 intermediate events in, 327-330
 ischemia and, 368-369
 late events in, 330-333
 modification of, with exogenous growth factors, 397-405
 normal, and scar formation, 452-456
 phases of, 322-323, 397-399, 452-454
 proliferative phase of, 342
 radiation damage impairing, 369
 scarless, 357-365
 organ specificity and, 359
 species differences in, 359
 smoking and, 371
 steroids affecting, 371
 Wounds, acute, physiology of, 321-340
 care of, in hospitalized patient, multidisciplinary approach to, 425-431
 local, in chronic problem wounds, 375-379
 chronic, classification of, 343
 factors promoting, 346
 final common pathway of, 351-353
 pathophysiologic mechanisms of, 346-351
 physiology of, 341-356
 types of, 342-346
 chronic problem, 367-396

and managed care, 393
classification of, 368
evaluation of, 372-374
management of, 374-391
nonsurgical management of, 391-393
prevention of recurrence of, 391
factitious, 390, 477-478
fetal, 357-365
normal, physiology of, 341-342

overhealing of, 436
size of, wound repair response and, 363
Wrinkles, CO₂ laser resurfacing in, 119, 123-124
Wrist, deficiency of, and bilateral hypoplastic thumb,
548, 550

Xerogels, 435-436
